Monet Series

Outdoor Cabinet Energy Storage System

SPECIFICATION

1. Product Introduction

1.1. Model Description

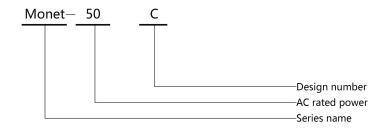

Figure 1-1Model identification

1.2. Product Function

The Monet series outdoor energy storage cabinet integrates energy storage batteries, modular PCS, energy management monitoring system, power distribution system, environmental control system, and fire control system. It adopts modular PCS for easy maintenance and expansion. The outdoor cabinet adopts front maintenance to reduce the occupied area and maintenance channel. It has the characteristics of safe and reliable operation, fast deployment, low cost, high energy efficiency, and intelligent management.

The operating strategy of the energy storage system in common application scenarios is as follows:

Peak shaving and valley filling:

• When the time-of-use tariff is at its valley segment: The energy storage cabinet automatically charges, and then remains idle after full charging; When the time-of-use tariff is at its peak segment: The energy storage cabinet automatically discharges, realizing the arbitrage of price difference and improving the economic efficiency of the photovoltaic-energy storage-charging system.

Photovoltaic-energy storage integration:

 Real-time acquisition of local load power, photovoltaic power generation priority is self-generation and self-use, and surplus electricity storage; When the power generated by photovoltaic power generation is insufficient to provide local load, the battery storage is prioritized.

1.3. Electrical Wiring Diagram

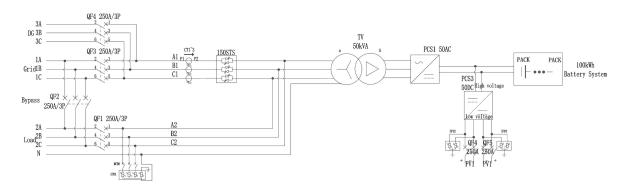

Figure 1-2 Electrical Wiring Diagram

• The system scheme with grid-connected and off-grid capabilities, isolated transformer, and photovoltaic input has different wiring configurations for different projects, and the actual wiring may vary slightly. Actual wiring should be based on the drawings provided with the product shipment.

1.4. Product Features

- The system has been commercialized, integrating energy storage batteries, energy storage converters, photovoltaic converters, energy management monitoring systems, power distribution systems, environmental control systems, and fire control systems. It can fully control the operation status and risks of the system.
- Real-time acquisition of local load power, photovoltaic power generation priority is self-generation and self-use, and surplus electricity storage; When the power generated by photovoltaic power generation is insufficient to provide local load, the battery storage is prioritized.
- The protection level is IP55, which can perfectly cope with various types of weather in the outdoor environment.

- It adopts door-mounted embedded integrated air conditioning, which does not occupy cabinet space, improves the available space of outdoor cabinets, has better structural integrity at the top, and has good waterproof performance.
- The local control screen can achieve diversified functions such as system operation monitoring, energy management strategy development, equipment remote upgrading, etc.

1.5. Product Parameters

The following are typical configuration parameters of the Monet series outdoor cabinet-type photovoltaic-energy storage system. Actual delivery shall be subject to the technical agreement.

Table 1-1 Energy Storage System Parameter Sheet

Model	Monet-50C	
Sub-Model	50TS(DC50)(100kWh)	
Battery Parameters		
Battery rated capacity	100kWh	
Battery rated voltage	844.8V	
Battery voltage range	739.2V~950.4V	
Battery type	LFP	
Battery cell capacity	1P*24S*11S	
Cell Capacity	120Ah	
Max.charging/discharging power	1P	
Max.charge/discharge current	120A	
Photovoltaic Parameters		
Rated power	50kW	
PV Voltage Range	250~500V (MPPT)	
PV Max. Current	160A	
MPPT quantity	2	
AC Parameters		
Rated AC power	100kW	
Rated AC current	144A	
Rated AC voltage	400V, 3W+N+PE	
Rated AC frequency	50/60Hz	
THDi	<3 (Rated power)	
Power Factor	-1leading to+1 lagging	
THDv	<3% (linear load)	
General Parameters		
Protection level	IP55	
Protection level	I	
Isolation mode	Isolation transformer	

Shutdown self-discharge	< 0.1% Rated power (Without transformer)
Display	LCD
Relative humidity	0 ~ 95% (No condensation)
Noise	< 78dB
Ambient temperature	-25℃ to +60℃(Derating above 45℃)
Cooling mode	Intelligent air-cooled
Altitude	3000m(> 2000m derating)
Communication interface	CAN/Ethernet / 485
Dimension (W * D * H)	1300*1000*2100mm
Weight (approx.)	2000kg

1.6. Human-machine Interface Introduction

The home page interface displays real-time power, voltage, current, generated energy, operation mode, working status and other information of the system.

1.7. Appearance Diagram
